Features:

In the original operational amplifier circuit, the low frequency of the timbre is improved, and the overtone is increased, thereby increasing the bandwidth of the intermediate frequency, obtaining more sustain and making the sound more three-dimensional and firm. The tone control has been improved and shaped, and the mid-high frequency is implemented, the tone is brighter and sharper, and the sound is not dull and harsh.

Specifications

Input impedance: 1M Ohms

Output impedance: 10K Ohms

POWER: DC9V <100mA,(Internal negative external positive)

Weight: ~230g

Dimensions: 46(L)*95(W)*51(H)mm

Thank you for choosing and purchasing the DK Brand !
